

Instant Water Heating Element For Bidet

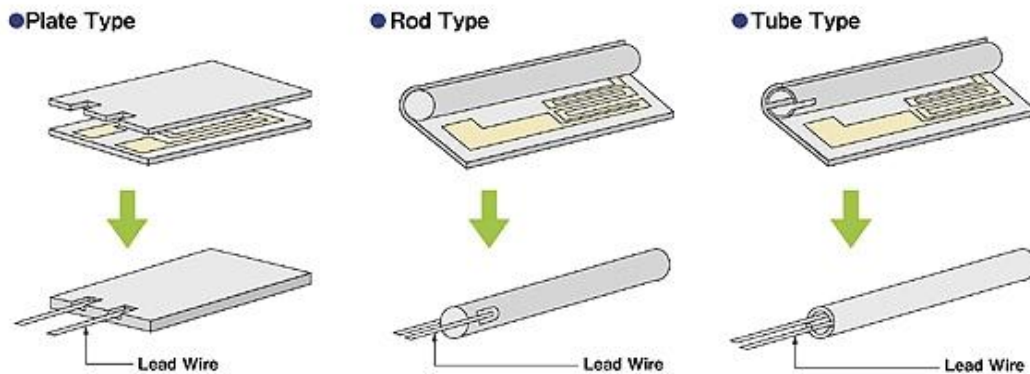

Greenway Instant Water heating element for Bidet made by MCH ceramic heating component is a highly efficient environmental protection and energy saving ceramic heating components, mainly to replace now the most widely used alloy wire electronic components and PTC heating electric heating element and component.

Model:G94115SC

Instant Water heating element for Bidet

Greenway Instant **Water heating element for Bidet** made by MCH ceramic heating component is a highly efficient environmental protection and energy saving ceramic heating components, mainly to replace now the most widely used alloy wire electronic components and PTC heating electric heating element and component.

Process of Instant Water heating element for Bidet

More details of Instant Water heating element for Bidet

Main material: aluminum ceramic

Working voltage: 120V OR 230V

Power: dual power;

Leads A-C: 750W~850W

Leads B-C: 750W~850W

Total heater length: 94mm long

Heating element OD: 11.5mm/ID 6.5mm

Ceramic Flange: Disc or square/dimension already models or customization

Cable: already or customization
